6. Evaluating Progress Toward Measurable Goals MCM 5

Use this page to report on your progress and project plans toward achieving measurable goals identified in your Stormwater Management Program Plan (SWMPP), including requirements in Part III.C.1. Submit additional pages as needed.

A. Briefly summarize the Measurable Goal identified in the SWMPP in this reporting period.

To continue to monitor new projects and redevelopment projects which result in land disturbance activities to assure that they meet the requirements of the Village Code with respect to storm water runoff, erosion control and submission of SWPPPs.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

The goal of minimizing site runoff from new and redevelopment projects is enforced by site plan reviews conducted by the Planning Board and Board of Trustees both of which utilize the Village Engineer to review site plans and assure the containment and disposal of all storm water runoff on-site. There were no projects with site disturbances of 5,000 s.f. during the reporting period.

C. How many times was this observation measured or evaluated in this reporting period?

0	0	0	1
---	---	---	---

(ex.: samples/participants/events)

D. Has your MS4 made progress toward this measurable goal during this reporting period?

Yes No

E. Is your MS4 on schedule to meet the deadline set forth in the SWMPP?

Yes No

F. Briefly summarize the stormwater activities planned to meet the goals of this MCM during the next reporting cycle (including an implementation schedule).

To continue to monitor new projects and redevelopment projects which result in land disturbance activities to assure that they meet the requirements of the Village Code with respect to storm water runoff, erosion control and submission of SWPPPs. The Village will explore the possibility of utilizing green infrastructure in the form of rain gardens, on Village property, for stormwater management.

1. Choose/list each municipal operation/facility that contributes or may potentially contribute Pollutants of Concern to the MS4 system. For each operation/facility indicate whether the operation/facility has been addressed in the MS4's/Coalition's Stormwater Management Program(SWMP) Plan and whether a self-assessment has been performed during the reporting period. A self-assessment is performed to: 1) determine the sources of pollutants potentially generated by the permittee's operations and facilities; 2) evaluate the effectiveness of existing programs and 3) identify the municipal operations and facilities that will be addressed by the pollution prevention and good housekeeping program, if it's not done already.

MS4 Annual Report Form

This comment section is being submitted for the reporting period ending March 9, 2015

Incorporated Village of Bayville

SPDES ID NYR20A304

The Draft Annual MS4 Report was presented to over 80 members of the public at a regularly scheduled meeting of the Board of Trustees on May 18, 2015. Three questions related to the MS4 program were posed by members of the public.

The first resident inquired about the frequency of water quality testing of surrounding water bodies. Water quality in these waterways is not tested at the present time.

The second resident asked why the Stormceptor installed by the Village in a privately owned road is not maintained by the Village. While the Village constructs and installs drainage improvements on private roads in the Village, the maintenance of the improvements becomes the responsibility of the local homeowners.

The same resident questioned why vegetation wasn't included in the recent Creek Road reconstruction. The New York State Department of Environmental Conservation did not require planting for this project.
